EAARS PICNIC
SATURDAY, SEPTEMBER 9TH
EAARS MEMBERS ONLY
RSVP * RSVP * RSVP * RSVP

Announcing the annual EAARS picnic, to be held at Discovery Park in Safford, on Saturday September 9, 2023, starting at 2:00 PM. As has been the policy of EAARS over the past few years, this picnic is for current paid up EAARS members ONLY and immediate family, IE spouse/child. You should know whether or not you are a current paid up member. If you have any questions in this regard, just ask. Thank you all for your understanding.

EAARS will be furnishing the meat and drinks. We will also provide paper plates and plastic utensils. It is suggested however that you bring your own utensils for easier cutting of the meat. If you desire to bring something to share, such as salad, beans, desert, etc that will be great.

The picnic will be by RSVP. Please email your intentions to attend no later than Saturday, September 2nd to Larry N5BG. Please in your RSVP indicate your callsign, name and number in your party. Please don't call via the radio and say your coming, too much possibility of error on our part.

NOTE: we must limit the number of attendees to 50, due to room capacity.

Email: LGRIGGS@AZNEX.NET Note we require this lead time for placing the order for the food.

73 Larry N5BG,
EAARS secy/treas

GREENS PEAK UPDATE

Once again, your dues are hard at work. In July, needed repairs were made at the Greens Peak EAARS repeater site. Not only is it a long drive to get there, but parts were needed for this repair.

During the month of July, club Vice President Joe, K7JEM and club Treasurer Larry, N5BG took the long drive to the Greens Peak repeater site with a large selection of parts, in aim to correct the issues at Greens Peak. Fortunately, one of the parts they took, was the problem at the site and they were able to make the needed repairs.

Pulling double duty beyond being club officers, they also serve as two of our main radio techs to make repairs when needed. Since the drive is a little longer than some of the other sites, this was an all day excursion for them which means it had to be planned, thought out and scheduled. So, when they both decided on a day when their favorite soap operas weren't airing, off they went with a hammer, screwdriver and blow torch.

Upon reaching the site, there were actually two issues found at the site. Both issues were contributing to the cause of failure.

The first issue found, was the link radio transmitter was barely putting out any power. So, the link radio power module was replaced which restored proper power output from Greens Peak to Pinal Peak. It's great to have a supply of spare parts to correct these kinds of issues.

Hold on though, there was a second issue... Now that the proper power was restored to the link radio transmitter, where was it being beamed to? Well, come to find out, it wasn't heading directly to Pinal Peak. It decided to make a slight detour because the link radio's yagi antenna, decided to blow a little off course. So, one of these two had to do a climb to point the antenna in the right direction and secure it. Now, since I was not there, I'm not sure which one climbed, but I think I can make a good guess though and the other had to remain on the ground to supervise, eat lunch and drive the truck back home leaving one on the tower. Just Kidding (or am I?)

Once these two repairs were made, Greens Peak was back on the air and talking to the other repeaters on the link. We thank both Joe and Larry for making these repairs. It's because of them and your paid up dues, that these repairs were made. **THANK YOU BOTH !!**

The Amateur Radio Council of Arizona held its annual meeting on July 15th 2023 at the Flagstaff Hamfest.

The council awarded a scholarship check of \$5,000.00 to Derek Blowers/KK7CGP from the Hualapai Amateur Radio Club. Derek will be entering Northern Arizona University this fall and majoring in Electrical Engineering and minoring in Mathematics.

The council also recognized Bill Maynard/W7ZT of the Sunlife Amateur Radio Club as the ARCA Ham of the Year for his many contributions to amateur radio.

The council awarded a grant of \$3,000 to the Cochise Amateur Radio Association to assist in replacement of hardware for the 147.02 repeater on Mule Mountain, and entertained a request from the Catalina Radio Club for a grant to assist with replacement of a repeater located near the Tucson International Airport (grant request to be voted on at the next ARCA meeting).

A series of proposed changes to the ARCA constitution and bylaws were also discussed and will be voted on at the next ARCA meeting.

Finally, the current ARCA board was re-elected to another term. The positions remain: Chair: Charlie Zurenko/N2TFS, First Vice-Chair: Ray Vasquez/K4RMV, Second Vice-Chair: Tom Cloonan/NL7FQ, Secretary: Lee Ilse/K7OED, and Treasurer: Chris Kesauer/N7PVL (this position is appointed by the elected board).

The next meeting of the council will be at the RST Fall Hamfest in Tucson on October 7th.

EAARS STREAMING AUDIO

Listen to EAARS from almost anywhere

Did you know that if you travel outside of the EAARS coverage area, you can still monitor the EAARS system? EAARS provides 24/7 streaming audio to your Smart Phone, Tablet, Laptop and Desktop Computer. There are many apps that allow you to listen in. Just search for "Police Scanner" apps in your Play Store or other areas depending on your phone.

The most common app to install, is called "Broadcastify". This app along with others, allow you to focus right into the state, county and town to monitor local Ham Repeaters, Police & Fire, Rail and many other services. If you don't want to install an app, you can also go to <https://www.broadcastify.com/listen/> and click your way through the map. You can also visit the EAARS website at eaars.com and click on "Click Here To Listen To Live EAARS Repeater Audio"

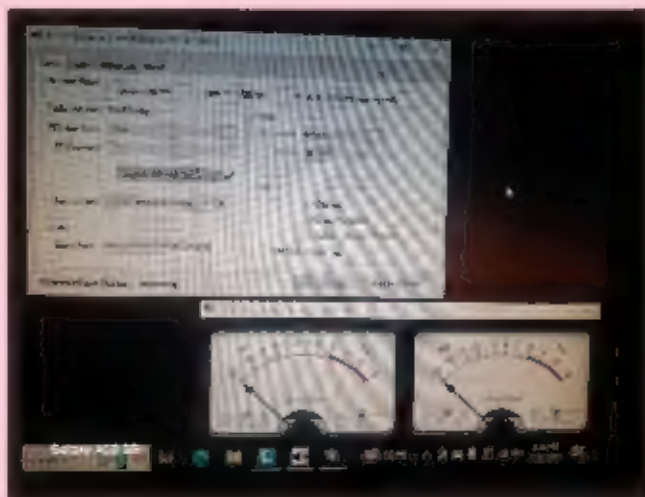

Although EAARS has Echolink & IRLP, it is considered "Bad Practice" to use these services just to listen only. Please use streaming audio if you want to just monitor traffic on the repeater. You can stay connected with streaming audio for as long as you like. ENJOY !!!

Also please note... With the latency of the internet, the EAARS audio is slightly delayed. For example... If the Saguaro Traffic Net starts right at 6:30pm, then you will hear the streaming audio around 6:01pm through your streaming device.

The streaming audio feed is unlimited feeds. Many can connect at the same time and listen in.

Keep your Ears on EAARS or listen to your favorite EAARS Net.

73,
Chris N7JND

Other Club Stuff

Cooking up
Some Magic

Cheeseburger Biscuit Cups

Cheeseburger Biscuit Cups are a kid-approved and family favorite dinner with refrigerated biscuits topped with Velveeta cheese and ground beef cheeseburger mixture! Simple ingredients, easy to prepare, and it's a 30 minute meal.

Ingredients

1 lb ground beef
1/2 cup ketchup
2 tablespoons light brown sugar
1 tablespoon yellow mustard
1 teaspoon Worcestershire sauce
2 tubes (6 oz each) refrigerated biscuits
4 oz Velveeta cheese cubed small

*Prep Time: 5 min
Cook time: 25 min
Servings: 10 biscuit cups*

*Courtesy of Together
as Family.com*

Instructions

1. Heat oven to 400°. Prepare a 12-cup muffin pan and spray 10 of the muffin cups with cooking spray. Set aside.
2. In a skillet pan, over medium-high heat, cook and crumble ground beef until no longer pink. Drain.
3. Add the ketchup, brown sugar, mustard, and Worcestershire sauce. Stir to combine. Turn heat to LOW and let it simmer while you prepare the muffin cups.
4. Take one biscuit and smush it out to make a large, flat circle shape. I use my hands for this (it's easiest) but you could also use a rolling pin.
5. Press it into a muffin cup. Repeat with remaining biscuits.
Place 2 cubes of Velveeta cheese into each biscuit cup.
6. Top with a large scoop of the cheeseburger mixture (fill to the top of the biscuit) and then place 2 more Velveeta cheese cubes on top of each biscuit cup.
7. Cook for 13-15 minutes or until biscuit cups are golden brown on top and cooked through.
8. Let cool for about 5 minutes in the muffin pan and then serve.
